About Us

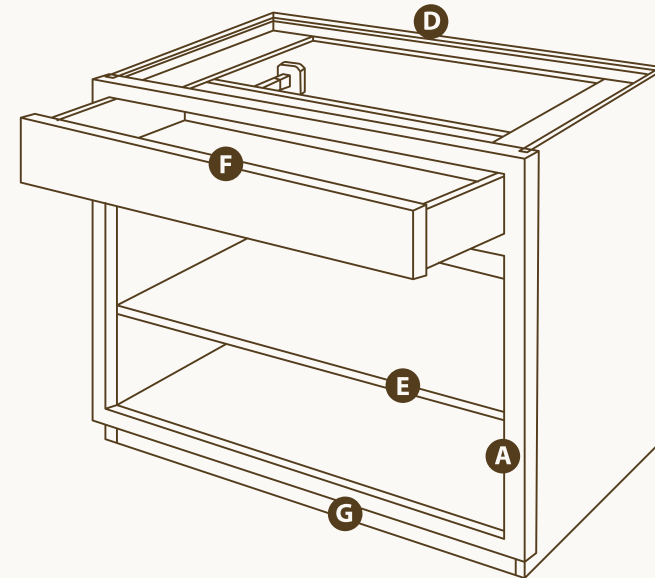

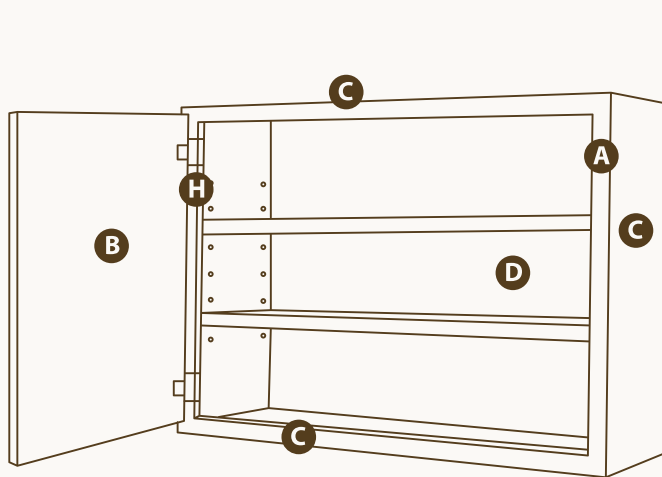

SWI Interiors is a privately owned custom cabinet manufacturer. Founded in 1996, SWI Interiors started out as a one man shop building modest kitchen and bath cabinetry from a barn in the small rural town of Osage, Minnesota. Over 25 years later, Steve, along with his wife Heidi have developed the once small shop into a state-of-the-art, 65,000 square foot facility equipped with CNC machining, flat line finishing, and design center with the latest in custom cabinetry software.

SWI offers custom built cabinetry, laminate & solid surface countertops, closet systems, pre-finished hardwood flooring, tongue & groove paneling, millwork/case work and custom finishing of millwork. Custom cabinetry is our specialty, offering a large variety of woods, door styles, stain and paint colors, 1/2" dovetail drawers, and virtually unlimited customization for our customers. We can produce a small vanity or an entire house. No project is too big or small!

Our primary objective is to provide a quality product and outstanding customer service. We take great pride in producing a custom product and enjoy seeing it take shape and become that focal point your home.

Cabinet Specifications

A. Face Frames

- Constructed of $\frac{3}{4}$ " solid wood
- All face frames are precisely aligned with glue and nailed for reinforcement

B. Doors

- Solid wood stile and rails
- Solid wood, wood veneer or various hardwood component door panels

C. Top, Bottom, and End Panels

- Constructed of $\frac{3}{4}$ " particleboard with $\frac{3}{4}$ " Hard Rock Maple interiors

D. Back Panels

- Constructed of $\frac{1}{2}$ " Hard Rock Maple

E. Shelves

- $\frac{3}{4}$ " thick full depth adjustable edge banded Hard Rock Maple

F. Drawers

- Constructed of $\frac{1}{2}$ " Birch plywood dovetailed drawer box with a $\frac{1}{4}$ " Birch plywood bottom
- $\frac{7}{8}$ " extension undermount soft close drawer sides w/ a 150 lb load rating

G. Toe Kick

- The toe kick is inset into the cabinet box $3\frac{3}{4}$ " and is $3\frac{3}{4}$ " high
- Toe Kicks are $\frac{3}{4}$ " particleboard

H. Hinges

- Standard Overlay - Compact 38 concealed 105° soft close cup hinge
- Full Overlay - Compact 39 concealed 110° soft close cup hinge

Wood Species, Door Style & Color Options

Red Oak

Is characterized by its wide-open grain patterns & extreme durability. Variation in grain pattern & color, small knots & pin holes are attributes of nature giving oak its distinctive beauty. Natural occurring color variation includes light tan & pink to medium dark red & brown with occasional green, yellow & black mineral streaks. These characteristics are more prominent in natural & lighter stain finishes.

Birch

Birch has light yellow sapwood and reddish-brown heartwood. Once stained, the color differences are less pronounced. It has straight, close grain and a fine, even texture.

Hickory

Is known for its strength, open grain & distinctive color variation within each piece of wood. Ranging from light to deep brown, hickory's unpredictable color spread is especially noticeable in a natural or light finish, with darker stains mellowing the variation. Color variation, small pin holes & knots are naturally occurring & rustic hickory incorporates larger sporadic knots & pin holes. These characteristics are acceptable & not considered warranty defects.

Alder

Has a fine, straight-grain pattern & even texture. The color is a light brown with a reddish tinge that stains evenly. Alder includes character spots, knots, burls & blemishes which do not affect product durability. As one of the softest hardwoods, alder can be easily dented or scratched. These characteristics are not considered warranty defects.

Painted MDF/HDF

Combines hardwoods & engineered materials including solid wood, engineered materials – such as medium density fiberboard (MDF) & high-density fiberboard (HDF) & similar composite materials providing a smoother surface for painting & superior stability, consistency & durability.

Montana Maple

Montana Maple is very similar to hard maple in most respects. Generally, the sapwood is greyish-white, sometimes with darker colored pith flecks. The heartwood varies from light to dark reddish-brown. The wood is usually straight-grained.

Other wood species available upon request:

Cherry, Rustic Cherry, Maple, Rustic Maple, Soft Maple, Walnut, Quarter Sawn White Oak, Circle Sawn Rustic Hickory and more.

Wood Species, Door Style & Color Options

Rustic

The term rustic refers to using material that presents a more authentic country, rural feel to the cabinetry. The cabinets are designed to include a large amount of character elements in the wood. These elements include:

- **Knots** – solid, with no loose material
- **Heartwood & Sapwood** – heartwood is the center part of the log. It is usually darker than the surrounding sapwood which is considered the “living” part of the tree. This is especially true with hickory where the contrast can be dramatic.
- **Pitch pockets** – these are openings in the sapwood where sap has accumulated.
- **Checks & splits** – these are cracks in the wood where the wood cells have split.
- **Mineral streaks** – form when trees absorb minerals from the soil & stain the wood fiber.

The Rustic cabinetry you buy can have some or all these elements. They are distributed randomly by nature. This gives the cabinetry its rustic appeal.

The Rule of 3

Having the entire cabinet be made of rustic material would be too much & overpower the room. Cabinets that have rustic parts are specified to have approximately 1/3 knots, 1/3 rustic characteristics other than knots & 1/3 clear. This has proven to be the most aesthetically appealing ratio.

It is possible that a random door or drawer front will not have a knot or characteristic. This is by design for a better visual appearance & not considered a quality defect.

All Door styles are available in Standard, Full Overlay and Frameless.

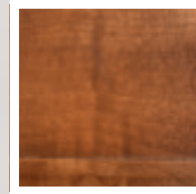

Soft Close Door and Undermount Soft Close Drawer come standard in all Dynamic Homes Cabinetry.

Alder/Rustic Alder

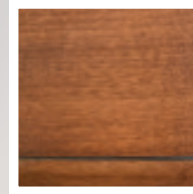

Color Options

What Color Inspires You?

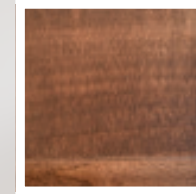

Choosing the right color and style can bring your cabinetry to life. If one of the standard stain or paint options available speaks to you great. If its not, there are other colors available to choose that is perfect for your project by doing a custom paint or stain color. For a custom color match we will provide you with a sample for approval. This may increase your delivery time.

Glazing & Distressing

*Silver Fox with
Chocolate Glaze
on Rustic Alder*

*Taconite with
White Powder Glaze
on Rustic Hickory*

*Burnt Sugar with
Black Glaze and Oversanded
on Alder*

*Pro White with Black Glaze,
Oversanded and Distressed
on MDF*

This kitchen is pictured in Natural Rustic Hickory with a Black Glaze and Distressed.

Glazed finishes highlight detail and create an impression of aging. Glazing is a finish step in which a pigmented material is applied to the surfaces, then hand-wiped partially away. This allows the glazing to “hangup” in areas of detail. Since this process is done by hand no two doors will look exactly alike.

Distressing provides an aged, timeworn look to cabinetry. SWI Interiors distressing includes your choice of oversanding and/or distressing.
